- Equipment Relocation Services
- Emergency Service and Support

Benefits to our Customers

LDX Solutions offers a comprehensive array of services to help plants stay in compliance. This may mean something as small as a simple spare part rushed overnight to the plant, a routine inspection, or a major rebuild during a planned plant shutdown.

We service air pollution control equipment for all types of pollutants, such as technologies that remove particulate matter (PM), acid gas absorption, heavy metals removal (including mercury), volatile organic compounds (VOCs) and nitrogen oxides (NOx).

- Wet Electrostatic Precipitators (Wet ESP)
- Regenerative and Catalytic Thermal Oxidizers (RTO/RCO)
- Wet Scrubbers (Venturi Type, Packed Tower, Spray Tower)
- Fabric Filters (Baghouses)
- Sorbent Injection Systems (Lime, Powder Activated Carbon)
- Circulating Dry Scrubbers (CDS)
- SNCR Systems
